

## Science: Year R – Year 6

- **The table below contains links to different series of fantastic Science lessons for Year R to Year 6. Each lesson has been produced by an experienced teacher from one of our Hamwic schools. Simply search for Hamwic Education Trust on YouTube and subscribe to our channel.**
- **You should watch the lessons in the right order as they will help develop skills in the essential areas of science.**
- **We will arrange at least two face to face sessions with you per week through Google Meet, Zoom or Teams. This will be your chance to ask questions and to show us what you have produced. We can give you feedback and make suggestions about next steps and how to make your work even more incredible! If you get stuck on anything, make a note of what you are struggling with and you can ask your teacher at the next session. You could also email them to your designated teachers.**
- **Remember – you will need paper and a pen before you start!**

Below is a table of links to a selection of online lessons. The link will take you to the first lesson in a series of lessons for you to work through.
